

INTERNATIONAL POSTDOCTORAL PROGRAM 2017

Application deadline: 31 May 2017

Genethon, a leading organisation in gene therapy for rare genetic diseases is seeking highly motivated post-doctoral fellows. Positions are available for a period of three years (37-41 k€ annual gross income depending on qualifications and experience).

A list of projects is available on our website <http://www.genethon.fr/en>

Eligibility

Candidates should meet the following criteria:

- Maximum three years of post-doctoral experience
- Interest in basic and translational research of genetic diseases
- Solid background in cell and molecular biology
- Good publication record and excellent references
- Excellent English knowledge
- Be creative and capable of developing a competitive research project in autonomy under the supervision of a team leader.

Application

Candidates should send the following documents, as a single PDF file, to:

postdoctoral-program@genethon.fr:

- Cover letter, including a motivation statement (1 page)
- Detailed CV, including a summary of candidate's research experience
- List of publications and communications
- List of 2-3 referees qualified to provide a recommendation letter

Genethon

Non-profit organization hosting over 200 scientists, located in the southern outskirts of Paris within the Genopole of Evry, France's leading biotechnology and biotherapy science park. Genethon was founded by the French Muscular Dystrophy Association. Genethon's mission is the discovery and clinical development of novel strategies for gene therapy of rare diseases. Genethon offers excellent R&D facilities including a state-of-the art imaging facility. Its research activities are supported by Inserm,
